Subject index

Acid modified electrodes
Carbon paste electrodes modified with palmitic acid and stearic acid for the determination of folic acid (vitamin B9) in both aqueous and biological media (El-Maali) 465
Acid phosphatase
The effects of a strong constant magnetic field on the activity and localization pattern of acid phosphatase in *Blepharisma* (Zhang, Dong) 513
Alicaligenes eutrophus hydrogenase
Bioelectrocatalysis of NAD^+ reduction (Cantet et al.) 475
Alkaline phosphatase
Amperometric sensor based on the alkaline phosphatase activity (Pariente et al.) 73
Ambazone
The electrochemical redox behaviour of the antineoplastic 1,4-benzoquinone-guanylhydrazone-thiosemicarbazone (ambazone) (Horn, Schulze) 221
Amino acids
Amino acids and urea sensors using parsley seeds as biocatalyst (Sato et al.) 199
Aminobutyric acid
Carbonic anhydrase, CO_2 transport and GABA homeostasis: an in-vitro model (Botrè et al.) 487
Amperometric biosensing
Amperometric biosensing of cinnamic acid using a spinach-based biocatalytic electrode (Wang, Naser) 441
Amperometry
Amperometric sensor based on the alkaline phosphatase activity (Pariente et al.) 73
Amplitude modulation
Intensity dependence of enolase activity by modulated radiofrequency radiation (Dutta et al.) 179
Anabaena
Cyclic voltammetric behavior of [2Fe–2S] ferredoxins at a lipid bilayer modified electrode (Salamon, Tollin) 381
Antineoplastic agents
The electrochemical redox behaviour of the antineoplastic 1,4-benzoquinone-guanylhydrazone-thiosemicarbazone (ambazone) (Horn, Schulze) 221
Benzoquinone
The electrochemical redox behaviour of the antineoplastic 1,4-benzoquinone-guanylhydrazone-thiosemicarbazone (ambazone) (Horn, Schulze) 221
Benzoquinones
Reductive activation and radical formation in a series of substituted benzoquinones. Thermodynamic and quantum chemical studies (Janssen et al.) 161
Bilayer
Mechanism and kinetic analysis of the photo-induced electron transfer mediated by a stacked metallotriporphyrin in planar lipid bilayers (Lamrabte et al.) 449
Biocatalyst
Amino acids and urea sensors using parsley seeds as biocatalyst (Sato et al.) 199
Biocatalytic electrode
Amperometric biosensing of cinnamic acid using a spinach-based biocatalytic electrode (Wang, Naser) 441
Bioelectrocatalysis
Bioelectrocatalysis of NAD^+ reduction (Cantet et al.) 475
Bioelectrochemistry
Report on Bioelectrochemistry IV (Blank) 519
Biomembranes
Permeability barriers formed by membrane lipids (De Gier) 1

Biophysical aspects
Some biophysical aspects of the genetic effect of low-intensity millimeter waves (Belyaev) 11
Biophysical–chemical cancer therapy
The role of complex biophysical–chemical therapies for cancer (Randoll, Pangan) 341
Biosensor microfabrication
Integrated biosensors: promises and problems (Lal) 121
Biosensors
Cyclic voltammetric studies at the glucose oxidase enzyme electrode (Kumar et al.) 153
Bone
The treatment of pathological bone lesion with non-thermal, extremely low frequency electromagnetic fields (Kraus) 321
Calcium ions
Synergic effect of a phorbol ester and calcium ion (Malinin et al.) 49
Cancer
The role of complex biophysical–chemical therapies for cancer (Randoll, Pangan) 341
Can low frequency, low intensity magnetic fields be used in cancer treatment? (Sauerwein et al.) 347
Carbon dioxide transport
Carbonic anhydrase, CO_2 transport and GABA homeostasis: an in-vitro model (Botrè et al.) 487
Carbonic anhydrase
Carbonic anhydrase, CO_2 transport and GABA homeostasis: an in-vitro model (Botrè et al.) 487
Carbon paste electrode
Carbon paste electrodes modified with palmitic acid and stearic acid for the determination of folic acid (vitamin B9) in both aqueous and biological media (El-Maali) 465
Cavity resonator
Generation of homogeneous electric and magnetic fields at radio frequencies in a cavity resonator (Hetscher et al.) 305
Cell growth rates
Intensity- and frequency-dependent effects of microwaves on cell growth rates (Grundler) 361
Chemiluminescence
Influence of magnetic fields on phagocyte activation (Bochev et al.) 45
A chemiluminescent investigation of the interaction of red cell membranes with thiol compounds (Benov) 53
Chirality
Existence of selection rules on helicity during discrete transitions of the genome conformational state of *E. coli* cells exposed to low-level millimetre radiation (Belyaev et al.) 405
Chloroplasts
Mechanisms of photosystem I activity stimulation in trypsin-treated pea chloroplast membranes (Velitchkova, Ivanov) 27
Cinnamic acid
Amperometric biosensing of cinnamic acid using a spinach-based biocatalytic electrode (Wang, Naser) 441
Constant magnetic field
The effects of a strong constant magnetic field on the activity and localization pattern of acid phosphatase in *Blepharisma* (Zhang, Dong) 513
Copper–zinc
Observations on the direct electrochemistry of bovine copper-zinc superoxide dismutase (Iyer, Schmidt) 393
Coulometry
The electrochemical redox behaviour of the antineoplastic 1,4-benzoquinone-guanylhydrazone-thiosemicarbazone (ambazone) (Horn, Schulze) 221
Cryodamage
Cryodamage in ram sperm plasma membranes. Energy transfer and freeze-fracture studies (Ilieva et al.) 41
Current carriers
Scanning tunnelling microscopy in biology. Are the current carriers tunnelling electrons or hydrated protons? (Kell) 235
Cyanobacteria
Cyclic voltammetric behavior of [2Fe–2S] ferredoxins at a lipid bilayer modified electrode (Salamon, Tollin) 381
Cyclic voltammetry
Cyclic voltammetric studies at the glucose oxidase enzyme electrode (Kumar et al.) 153
Electrochemical properties of a gold electrode modified with a mixed monolayer (Takehara, Ide) 207
Disinfection
Electrochemical disinfection of marine bacteria attached on a plastic electrode (Nakasono et al.) 191

Dismutases
Voltammetric behaviour of bovine erythrocyte superoxide dismutase (Borsari, Azab) 229
Divalent cations
Electrofusion in the presence of divalent cations (Tsoneva et al.) 37
E. coli
An electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XIII. On the interaction of H^+–ATPase complex F_0F_1 with Trk proteins in anaerobically grown cells (Trchounian et al.) 367
Electrical pulses
Influence of electrical pulses on the transmembrane potential in yeast (Tomov, Tsoneva) 33
Electric fields
Basic applications of electric fields on biological cells (Berg) 89
Generation of homogeneous electric and magnetic fields at radio frequencies in a cavity resonator (Hetscher et al.) 305
Deformation on normal and fused haematopoietic blasts in ac electric fields (Gorczynska, Coster) 373
Electrochemiluminescence
Intermolecular energy transfer to riboflavin in electrochemiluminescence (Kulkarni et al.) 141
Electrofusion
Electrofusion in the presence of divalent cations (Tsoneva et al.) 37
Electromagnetic fields
Basic applications of electric fields on biological cells (Berg) 89
Current concepts of the interaction of weak electromagnetic fields with cells (Glaser) 255
Influence of weak non-thermic high-frequency electromagnetic fields on the membrane potential of nerve cells (Kullnick) 293
Survey of some working mechanisms of pulsating electromagnetic fields (PEMF) (Warnke) 317
The treatment of pathological bone lesion with non-thermal, extremely low frequency electromagnetic fields (Kraus) 321
Electron transfer
Mechanism and kinetic analysis of the photo-induced electron transfer mediated by a stacked metallotriporphyrin in planar lipid bilayers (Lamrabte et al.) 449
Electro-orientation
Orientation of elongated cells in ac electromagnetic fields with frequencies up to 150 MHz (Mischel et al.) 413
Electroporation
Influence of electrical pulses on the transmembrane potential in yeast (Tomov, Tsoneva) 33
ELF magnetic fields
Mycotypha africana in low-level athermic ELF magnetic fields. Changes in growth parameters (Broers et al.) 281
Elongated cells
Orientation of elongated cells in ac electromagnetic fields with frequencies up to 150 MHz (Mischel et al.) 413
Energy transfer
Cryodamage in ram sperm plasma membranes. Energy transfer and freeze-fracture studies (Ilieva et al.) 41
Enolase activity
Intensity dependence of enolase activity by modulated radiofrequency radiation (Dutta et al.) 179
Environmental factors
The influence of environmental factors on the ultraweak luminescence from yeast *Saccharomyces cerevisiae* (Ezzahir et al.) 57
Erythrocytes
Electrofusion in the presence of divalent cations (Tsoneva et al.) 37
A chemiluminescent investigation of the interaction of red cell membranes with thiol compounds (Benov) 53
Voltammetric behaviour of bovine erythrocyte superoxide dismutase (Borsari, Azab) 229
Ferment activity
Electrochemical methods for estimation of the ferment activity of a concentrate mixture of polyphenol oxidase (Cvetkovska et al.) 509
Ferredoxins
Cyclic voltammetric behavior of [2Fe–2S] ferredoxins at a lipid bilayer modified electrode (Salamon, Tollin) 381
Fibroblasts
Transmembrane potential measurements of

normal and transformed human fibroblasts following photodynamic laser therapy (Krammer-Reubel) 19

Flavinic mediator
Reduction of $NAD(P)^+$ by electrochemically driven $FADH_2$ and $FMNH_2$ (Bergel, Comtat) 495

Folic acid
Carbon paste electrodes modified with palmitic acid and stearic acid for the determination of folic acid (vitamin B9) in both aqueous and biological media (El-Maali) 465

Food vacuoles
The effects of a strong constant magnetic field on the activity and localization pattern of acid phosphatase in *Blepharisma* (Zhang, Dong) 513

Freeze-fracture
Cryodamage in ram sperm plasma membranes. Energy transfer and freeze-fracture studies (Ilieva et al.) 41

Genetic effect
Some biophysical aspects of the genetic effect of low-intensity millimeter waves (Belyaev) 11

Glucose oxidase
Cyclic voltammetric studies at the glucose oxidase enzyme electrode (Kumar et al.) 153

Gold electrode
Electrochemical properties of a gold electrode modified with a mixed monolayer (Takehara, Ide) 207
Electrochemical properties of the gold electrode modified with mixed monolayer assembly. The effect of a polar head group on the kinetics of the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ reaction (Takehara, Ide) 501

Growth parameters
Mycotypha africana in low-level athermic ELF magnetic fields. Changes in growth parameters (Broers et al.) 281

Guanyl/hydrazone
The electrochemical redox behaviour of the antineoplastic 1,4-benzoquinone-guanylhydrazone-thiosemicarbazone (ambazone) (Horn, Schulze) 221

Haematopoietic blasts
Deformation on normal and fused haematopoietic blasts in ac electric fields (Gorczynska, Coster) 373

High frequency electromagnetic ac fields
Influence of weak non-thermic high-frequency electromagnetic fields on the membrane potential of nerve cells (Kullnick) 293

Human erythrocytes
Temperature and transmembrane potential dependence of shape transformations of human erythrocytes (Glaser, Donath) 429

Hydrated protons
Scanning tunnelling microscopy in biology. Are the current carriers tunnelling electrons or hydrated protons? (Kell) 235

Integrated biosensors
Integrated biosensors: promises and problems (Lal) 121

Interaction
Current concepts of the interaction of weak electromagnetic fields with cells (Glaser) 255

Intermolecular energy transfer
Intermolecular energy transfer to riboflavin in electrochemiluminescence (Kulkarni et al.) 141

Lampito mauritii
Pb^{2+} uptake by *Lampito mauritii* by in vivo bioelectrochemistry (Santhanam et al.) 99

Laser therapy
Transmembrane potential measurements of normal and transformed human fibroblasts following photodynamic laser therapy (Krammer-Reubel) 19

Lead
Pb^{2+} uptake by *Lampito mauritii* by in vivo bioelectrochemistry (Santhanam et al.) 99

Lipid bilayer
Cyclic voltammetric behavior of [2Fe–2S] ferredoxins at a lipid bilayer modified electrode (Salamon, Tollin) 381

Lipids
Permeability barriers formed by membrane lipids (De Gier) 1

Luminescence
Influence of magnetic fields on phagocyte activation (Bochev et al.) 45
A chemiluminescent investigation of the interaction of red cell membranes with thiol compounds (Benov) 53
The influence of environmental factors on the ultraweak luminescence from yeast *Saccharomyces cerevisiae* (Ezzahir et al.) 57

Lung fibroblasts
Low-frequency electromagnetic fields induce

premature terminal differentiation of in-vitro cultured human skin and lung fibroblasts (Rodemann et al.) 269

Magnetic fields

Influence of magnetic fields on phagocyte activation (Bochev et al.) 45

Generation of homogeneous electric and magnetic fields at radio frequencies in a cavity resonator (Hetscher et al.) 305

Can low frequency, low intensity magnetic fields be used in cancer treatment? (Sauerwein et al.) 347

Marine bacteria

Electrochemical disinfection of marine bacteria attached on a plastic electrode (Nakasono et al.) 191

Membrane potential

Influence of weak non-thermic high-frequency electromagnetic fields on the membrane potential of nerve cells (Kullnick) 293

Membranes

Permeability barriers formed by membrane lipids (De Gier) 1

Preliminary study on the differences in the transmembrane resting potential of normal and neoplastic transformed tissue (Krammer-Reubel, Gruber) 23

Mechanisms of photosystem I activity stimulation in trypsin-treated pea chloroplast membranes (Velitchkova, Ivanov) 27

Cryodamage in ram sperm plasma membranes. Energy transfer and freeze-fracture studies (Ilieva et al.) 41

A chemiluminescent investigation of the interaction of red cell membranes with thiol compounds (Benov) 53

Effect of surface-active substances on the surface charge density of purple membrane fragments (Taneva) 63

Membrane transport systems

An electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XIII. On the interaction of H^+–ATPase complex F_0F_1 with Trk proteins in anaerobically grown cells (Trchounian et al.) 367

Metal ions

Pb^{2+} uptake by *Lampito mauritii* by in vivo bioelectrochemistry (Santhanam et al.) 99

Microwave bioaction

Existence of selection rules on helicity during discrete transitions of the genome conformational state of *E. coli* cells exposed to low-level millimetre radiation (Belyaev et al.) 405

Microwaves

Intensity dependence of enolase activity by modulated radiofrequency radiation (Dutta et al.) 179

Intensity- and frequency-dependent effects of microwaves on cell growth rates (Grundler) 361

Millimeter waves

Some biophysical aspects of the genetic effect of low-intensity millimeter waves (Belyaev) 11

Mixed monolayer assembly

Electrochemical properties of the gold electrode modified with mixed monolayer assembly. The effect of a polar head group on the kinetics of the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ reaction (Takehara, Ide) 501

Mixed thiol monolayer

Electrochemical properties of a gold electrode modified with a mixed monolayer (Takehara, Ide) 207

Mycotypha africana

Mycotypha africana in low-level athermic ELF magnetic fields. Changes in growth parameters (Broers et al.) 281

Natural products

Biotechnical potential of natural products (Banerji) 105

Neoplastic tissue

Preliminary study on the differences in the transmembrane resting potential of normal and neoplastic transformed tissue (Krammer-Reubel, Gruber) 23

Nerve cells

Influence of weak non-thermic high-frequency electromagnetic fields on the membrane potential of nerve cells (Kullnick) 293

Neuromuscular stimulation

Some aspects of functional neuromuscular stimulation (Devasahayam) 115

Normal tissue

Preliminary study on the differences in the transmembrane resting potential of normal and neoplastic transformed tissue (Krammer-Reubel, Gruber) 23

Oxidative phosphorylation

The effects of a strong constant magnetic

field on the activity and localization pattern of acid phosphatase in *Blepharisma* (Zhang, Dong) 513

Parsley seeds
Amino acids and urea sensors using parsley seeds as biocatalyst (Sato et al.) 199

Pathological bone lesions
The treatment of pathological bone lesion with non-thermal, extremely low frequency electromagnetic fields (Kraus) 321

Permeability
Permeability barriers formed by membrane lipids (De Gier) 1

Phagocytes
Influence of magnetic fields on phagocyte activation (Bochev et al.) 45

Phorbol esters
Synergic effect of a phorbol ester and calcium ion (Malinin et al.) 49

Phosphatase enzymes
Amperometric sensor based on the alkaline phosphatase activity (Pariente et al.) 73

Photoinduced charge transfer
Mechanism and kinetic analysis of the photo-induced electron transfer mediated by a stacked metallotriporphyrin in planar lipid bilayers (Lamrabte et al.) 449

Photosensitized membranes
Mechanism and kinetic analysis of the photo-induced electron transfer mediated by a stacked metallotriporphyrin in planar lipid bilayers (Lamrabte et al.) 449

Photosynthetic models
Mechanism and kinetic analysis of the photo-induced electron transfer mediated by a stacked metallotriporphyrin in planar lipid bilayers (Lamrabte et al.) 449

Photosystem I
Mechanisms of photosystem I activity stimulation in trypsin-treated pea chloroplast membranes (Velitchkova, Ivanov) 27

Pisum Sativum
Mechanisms of photosystem I activity stimulation in trypsin-treated pea chloroplast membranes (Velitchkova, Ivanov) 27

Plasma membrane
Deformation on normal and fused haematopoietic blasts in ac electric fields (Gorczynska, Coster) 373

Plastic electrodes
Electrochemical disinfection of marine bacteria attached on a plastic electrode (Nakasono et al.) 191

Polar head group
Electrochemical properties of the gold electrode modified with mixed monolayer assembly. The effect of a polar head group on the kinetics of the $Fe(CN)_6^{3-}/Fe(CN)_6^{4-}$ reaction (Takehara, Ide) 501

Polarization
Existence of selection rules on helicity during discrete transitions of the genome conformational state of *E. coli* cells exposed to low-level millimetre radiation (Belyaev et al.) 405

Polarography
The electrochemical redox behaviour of the antineoplastic 1,4-benzoquinone-guanylhydrazone-thiosemicarbazone (ambazone) (Horn, Schulze) 221

Polyphenol oxidase
Electrochemical methods for estimation of the ferment activity of a concentrate mixture of polyphenol oxidase (Cvetkovska et al.) 509

Porphyrins
Mechanism and kinetic analysis of the photo-induced electron transfer mediated by a stacked metallotriporphyrin in planar lipid bilayers (Lamrabte et al.) 449

Potassium
An electrochemical study of energy-dependent potassium accumulation in *E. coli*. Part XIII. On the interaction of H^+–ATPase complex F_0F_1 with Trk proteins in anaerobically grown cells (Trchounian et al.) 367

Premature terminal differentiation
Low-frequency electromagnetic fields induce premature terminal differentiation of in-vitro cultured human skin and lung fibroblasts (Rodemann et al.) 269

Proteins
Scanning tunnelling microscopy in biology. Are the current carriers tunnelling electrons or hydrated protons? (Kell) 235

Pulsating electromagnetic fields
Survey of some working mechanisms of pulsating electromagnetic fields (PEMF) (Warnke) 317

purple membranes
Effect of surface-active substances on the surface charge density of purple membrane fragments (Taneva) 63

Pyridine coenzyme
Bioelectrocatalysis of NAD^+ reduction (Cantet et al.) 475

Pyridine coenzymes
Reduction of NAD(P)$^+$ by electrochemically driven $FADH_2$ and $FMNH_2$ (Bergel, Comtat) 495
Radiation-induced reparation
Existence of selection rules on helicity during discrete transitions of the genome conformational state of *E. coli* cells exposed to low-level millimetre radiation (Belyaev et al.) 405
Radical
Reductive activation and radical formation in a series of substituted benzoquinones. Thermodynamic and quantum chemical studies (Janssen et al.) 161
Radio frequencies
Generation of homogeneous electric and magnetic fields at radio frequencies in a cavity resonator (Hetscher et al.) 305
Radiofrequency Radiation
Intensity dependence of enolase activity by modulated radiofrequency radiation (Dutta et al.) 179
Reduced flavin
Reduction of NAD(P)$^+$ by electrochemically driven $FADH_2$ and $FMNH_2$ (Bergel, Comtat) 495
Reductive activation
Reductive activation and radical formation in a series of substituted benzoquinones. Thermodynamic and quantum chemical studies (Janssen et al.) 161
Resting potentials
Preliminary study on the differences in the transmembrane resting potential of normal and neoplastic transformed tissue (Krammer-Reubel, Gruber) 23
Riboflavin
Intermolecular energy transfer to riboflavin in electrochemiluminescence (Kulkarni et al.) 141
Saccharomyces cerevisiae
Electrofusion in the presence of divalent cations (Tsoneva et al.) 37
The influence of environmental factors on the ultraweak luminescence from yeast *Saccharomyces cerevisiae* (Ezzahir et al.) 57
Scanning tunnelling microscopy
Scanning tunnelling microscopy in biology. Are the current carriers tunnelling electrons or hydrated protons? (Kell) 235
Schizosaccharomyces pombe
Orientation of elongated cells in ac electromagnetic fields with frequencies up to 150 MHz (Mischel et al.) 413
Sensors
Amperometric sensor based on the alkaline phosphatase activity (Pariente et al.) 73
Shape transformations
Temperature and transmembrane potential dependence of shape transformations of human erythrocytes (Glaser, Donath) 429
Skin
Low-frequency electromagnetic fields induce premature terminal differentiation of in-vitro cultured human skin and lung fibroblasts (Rodemann et al.) 269
Sperm plasma membranes
Cryodamage in ram sperm plasma membranes. Energy transfer and freeze-fracture studies (Ilieva et al.) 41
Spinach
Cyclic voltammetric behavior of [2Fe–2S] ferredoxins at a lipid bilayer modified electrode (Salamon, Tollin) 381
STM
Scanning tunnelling microscopy in biology. Are the current carriers tunnelling electrons or hydrated protons? (Kell) 235
Superoxide dismutase
Observations on the direct electrochemistry of bovine copper-zinc superoxide dismutase (Iyer, Schmidt) 393
Voltammetric behaviour of bovine erythrocyte superoxide dismutase (Borsari, Azab) 229
Surface-active substances
Effect of surface-active substances on the surface charge density of purple membrane fragments (Taneva) 63
Surface charge density
Effect of surface-active substances on the surface charge density of purple membrane fragments (Taneva) 63
Synergy
Synergic effect of a phorbol ester and calcium ion (Malinin et al.) 49
Thiols
A chemiluminescent investigation of the interaction of red cell membranes with thiol compounds (Benov) 53
Thiosemicarbazones
The electrochemical redox behaviour of the antineoplastic 1,4-benzoquinone-guanylhydrazone-thiosemicarbazone (ambazone) (Horn, Schulze) 221

Transformed cells
Transmembrane potential measurements of normal and transformed human fibroblasts following photodynamic laser therapy (Krammer-Reubel) 19
Transmembrane potential
Influence of electrical pulses on the transmembrane potential in yeast (Tomov, Tsoneva) 33
Temperature and transmembrane potential dependence of shape transformations of human erythrocytes (Glaser, Donath) 429
Transmembrane potentials
Transmembrane potential measurements of normal and transformed human fibroblasts following photodynamic laser therapy (Krammer-Reubel) 19
Transmembrane resting potential
Preliminary study on the differences in the transmembrane resting potential of normal and neoplastic transformed tissue (Krammer-Reubel, Gruber) 23
Trypsin
Mechanisms of photosystem I activity stimulation in trypsin-treated pea chloroplast membranes (Velitchkova, Ivanov) 27
Tyrosinase
Electrochemical methods for estimation of the ferment activity of a concentrate mixture of polyphenol oxidase (Cvetkovska et al.) 509
Ultraweak luminescence
The influence of environmental factors on the ultraweak luminescence from yeast *Saccharomyces cerevisiae* (Ezzahir et al.) 57
Urea
Amino acids and urea sensors using parsley seeds as biocatalyst (Sato et al.) 199
Voltammetry
Voltammetric behaviour of bovine erythrocyte superoxide dismutase (Borsari, Azab) 229
Yeast
Influence of electrical pulses on the transmembrane potential in yeast (Tomov, Tsoneva) 33
The influence of environmental factors on the ultraweak luminescence from yeast *Saccharomyces cerevisiae* (Ezzahir et al.) 57
